READING COMPREHENSION:

The Time Machine

My name is Professor Alex, and I am a scientist. Right now, I am working in my laboratory on a very special project: a time machine!

In the past, people traveled by horse and carriage. It was much slower than today's cars. Life was quieter, but communication was more difficult. My grandfather lived in a small house and wrote letters with a pen. He didn't have a smartphone or the internet.

Now, in the present, everything is faster. I am using the most powerful computer in the world to finish my invention. I am typing very fast because I am excited!

What about the future? I think the future will be amazing. Robots will help us with our homework, and people will travel to Mars. I believe the future will be the best era in history. I will visit the year 3000 next month!

Answer based on the text:

7. **What is Professor Alex doing right now?**

_____
_____
_____

8. **Where will people travel in the future?**

_____
_____
_____
